

## Flanged Termination

### ◆ Features and Electrical specifications:

Model	RFT50-10TM0904(R,L,I)
Frequency Range	DC~8.0GHz
Power	10 W
Resistance Range	50 Ω
Resistance tolerance	±5%
VSWR	1.20 max
Temperature coefficient	<150ppm/°C
Substrate material	BeO
Cap material	Al <sub>2</sub> O <sub>3</sub>
Flange	Nickel-plated copper
Lead	99.99% Sterling silver
Resistance technology	Thick Film
Operating Temperature	-55 to +155°C (See de Power De-rating)

### ◆ Outline Drawing (Unit: mm/inch):

Model: RFT50-10TM0904R

Model: RFT50-10TM0904L

Model: RFT50-10TM0904I

**Lead length can be customized according to customer requirements**

**Dimensional tolerance: 5% unless otherwise stated**

**Ready For Tackling Your Trouble**

◆Typical Performance:

◆Installation method:

◆Power De-rating:

◆P/N Designation:

#### ◆Matters needing attention

- After the storage period of newly purchased parts exceeds 6 months, attention should be paid to weldability before use. It is recommended to store in vacuum packaging.
- The ground requires optimal heat transfer.
- Manual welding should be used under a constant temperature soldering iron of no more than 350 degrees, and the welding time should be controlled within 5 seconds.
- In order to meet the requirements of the drawing, it is necessary to install a sufficiently large radiator. Metal surfaces and radiators need to be coated with a very thin layer of thermal grease.
- Add air cooling or water cooling if necessary

#### ◆ Description:

- Custom designed RF attenuators, RF resistors and RF terminals are available.
